

## The Markets (as of market close January 25, 2019)

Last week did not start off well in the market. However, stocks rebounded on Friday, recouping much of the value lost earlier in the week. Nevertheless, stocks ended last week relatively flat. Of the benchmark indexes listed here, only the S&P 500 lost value. Otherwise, the Global Dow gained over a half a point, while the Dow, Nasdaq, and Russell 2000 eked out minimal gains. News last Friday of the temporary end of the government shutdown may give investors some confidence moving into the last week of January.

Oil prices fell slightly last week, closing at \$53.55 per barrel by late Friday, down from the prior week's closing price of \$53.83 per barrel. The price of gold (COMEX) climbed to its highest price since last June, closing at \$1,308.20 by last Friday evening, up from the prior week's price of \$1,280.60. The national average retail regular gasoline price was \$2.251 per gallon on January 21, 2019, \$0.004 higher than the prior week's price but \$0.316 less than a year ago.

Market/Index	2018 Close	Prior Week	As of 1/25	Weekly Change	YTD Change
<b>DJIA</b>	23327.46	24706.35	24737.20	0.12%	6.04%

## Last Week's Economic Headlines

*Due to the partial government shutdown, some reports have not been updated. If and when this information becomes available, it will be included in the corresponding market report.*

- Sales of existing homes dropped sharply in December after increasing each of the prior two months. Total existing-home sales fell 6.4% from November's total and are now down 10.3% from a year ago. The median existing-home price in December was \$253,600, up 2.9% from December 2017 (\$246,500). December's price increase marks the 82nd straight month of year-over-year gains. Rising interest rates and declining inventory are major factors in the decrease in existing home sales. Available inventory of existing homes for sale fell from 1.74 million in November to 1.55 million in December, which equates to a 3.7-month supply at the current sales pace.
- For the week ended January 19, there were 199,000 new claims for unemployment insurance, a decrease of 13,000 from the previous week's level, which was revised down by 1,000. According to the Department of Labor, this is the lowest level for initial claims since November 15, 1969. The advance rate for insured unemployment claims remained at 1.2% for the week ended January 12. The advance number of those receiving unemployment insurance benefits during the week ended January 12 was 1,713,000, a decrease of 24,000 from the prior week's level.

## Eye on the Week Ahead

The last week of the month is potentially full of important economic information, including this year's first meeting of the Federal Open Market Committee. The employment figures for January are out as well. With the temporary end of the government shutdown, more economic information may be available.
